Environmental, Social and Governance Report 2021/22

二零二一／二二年環境、社會及管治報告

When carrying out and throughout the Group's investment, construction and operation, the Group adheres to the objective of "benefiting the society and the populace". Throughout the years, the Group is committed to improving its management and execution levels, upgrading its production facilities, to minimize pollution during its daily operation.

An environmental emergencies command division has been established as part of the mechanism, to coordinate and command any responsive actions and works. The division consists of four teams, including:

本集團在開展投資、建設和經營時並在整個期間內，堅持「惠予社會，好及百姓」的經營宗旨。多年來，本集團致力提升其管理及執行水平、改良生產設施，以盡可能減低其日常營運所造成之污染。

本集團已成立環境突發事件指揮處作為機制之一部分，以協調及指揮任何應變行動及工作。該部門由四個團隊組成，包括：

During the Reporting Period, the Group was not aware of material non-compliance with relevant environmental laws and regulations concerning the air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste.

於報告期間，本集團並未發現任何不遵守與空氣及溫室氣體排放、排入水土及產生有害及無害廢棄物相關的有關環境法律及法規的事件。

EMISSION

Air Emissions

The Group constantly devote effort in identifying and discovering new ways to reduce its greenhouse gas emissions and local public health risks, such as by way of upgrading its medical equipment. Without the necessity to operate large machineries, the carbon footprint generated from our daily operations is mainly from the consumption of energy and resources, such as electricity power and fuel used for vehicles.

The Group has adopted a green hospital development policy and applied low carbon strategies in all aspects of our operation which comply with the requirements by the government. We are committed to maintain green zone in hospital areas by deploying plants which absorb certain toxic and hazardous gas. We are researching and aspiring to achieve carbon-neutral building operation through upgrading the facilities and new hospital construction, for instance, using “green roof” system, adopting eco-friendly designs in accordance with solar orientation and prevailing wind.

Employees are encouraged to take public transportation. Meanwhile, our hospitals only provide a limited number of parking lots for in-patients and clients to restrict the traffic flow. Also, we understand that a well-designed arrangement in terms of the ambulances, hospitals vehicles, supply chain transportation is critical to the transportation-related carbon footprint reduction, whilst a proper utilization will also help for minimizing unnecessary travel.

The existence of social media (E.g., WeChat), video and web conferencing technologies consolidate the fundamental and facilitate a wider application of telemedicine. We will continue to explore and improve our uses of telemedicine as an alternative of face-to-face encounter in the fields such as remote patient monitoring and online medical consultation. These measures are expected to reduce the unnecessary travel by the customers significantly.

排放

廢氣排放

本集團不斷努力識別及探索降低溫室氣體排放及本地公共健康風險的新方法，例如升級其醫療設備。我們的經營無需使用大型機器，日常經營碳排放主要來自於能源及資源消耗，如電源及汽車耗用之燃料。

本集團已採納綠色醫院發展政策並將低碳戰略應用於我們經營的各個方面，以符合政府的要求。我們透過配置吸收若干有毒有害氣體的植物，致力維持醫院區域內的綠色空間。我們正在研究並渴望透過升級設施及新醫院建設（例如，使用「綠色屋頂」系統並根據朝陽方位及盛行風採用環保設計）實現碳中和樓宇營運。

本集團鼓勵員工乘坐公共交通工具。同時，我們的醫院僅為住院病人及客戶提供有限數量的停車位以限制交通流量。此外，我們明白，根據救護車、醫院車輛及供應鏈運輸作出合理設計的安排乃減少運輸相關碳足跡的必要之舉，而合理使用亦有助於將不必要的差旅減少至最低。

社交媒體（例如微信）及視頻及網絡會議技術的存在鞏固遠程醫療的基礎並促進遠程醫療得到更為廣泛的應用。我們將繼續探索及改進遠程醫療作為面對面接觸的替代方法，應用於遠程患者監護及線上醫療諮詢等領域。該等措施有望大幅減少客戶的非必要差旅。

Environmental, Social and Governance Report 2021/22

二零二一／二二年環境、社會及管治報告

Regarding the transportation aspect of our supply chain management, we tend to purchase or procure from the local suppliers and suppliers who use fuel-efficient transportation. Furthermore, we endeavor to minimize the frequency of supply transportation via better management on inventory control.

Waste Management

To contribute to healthy and sustainable environment development and focus on growing in harmony with the environment, we have put great effort in finding solution to reduce our carbon footprint. Before the authorized municipal environmental sanitation services contractors collect and dispose the general non-hazardous and domestic wastes, responsible staffs are appointed to classify and store them properly.

The collection and disposal of food scraps are separately managed and the assigned staff will oversee the whole process including the recording of waste categories, amount and treatment approaches detailly and comprehensively. The records will be reviewed regularly. In particular, food wastes and leftover are put into designated containers or buckets, and will be collected and reused by the third-party collectors. An agreement is entered with third-party collectors to ensure all food wastes and leftover are used for breeding and farming purposes only. Other food wastes such as vegetables, peels, organ meats, which are in the form of raw food or semi-processed food will be treated as domestic waste.

Through the World Health Assembly, the world's governments have called for greater action on medical waste due to the underestimation of the environmental and public health threat by its toxic and infectious properties.

在供應鏈管理的運輸方面，我們傾向於從當地供應商及使用節能運輸方式之供應商購買或採購。此外，我們致力透過更好的存貨控制管理盡量減少供應運輸的頻率。

廢物管理

為有助於環境的健康和可持續環境發展及專注於與環境和諧共存，我們付出了巨大的努力來尋找解決方案，以減少碳足跡。在獲授權的市政環境衛生服務承包商收集及處理一般無害廢物及生活廢物之前，負責工作人員被指派進行廢物分類及妥善地存放廢物。

食物殘渣的收集及處理是分開管理及獲指派工作人員將監督整個流程，其中包括廢物種類、數量及處理方法等詳細而全面地記錄。所有這些記錄均會定期審閱。特別是食物殘渣及吃剩的食物，會被放入指定的容器或桶內，並由第三方收集商收集及重用。我們與第三方收集商已訂立協議，確保所有食物殘渣及吃剩的食物僅作為養殖及農業用途。其他生食品或半加工食品的食物垃圾，例如蔬菜、果皮及內臟等，則當作生活廢物處理。

世界各國政府已透過世界衛生大會呼籲對醫療廢物採取大力行動，原因為醫療廢物的毒性及傳染性對環境及公共健康的威脅被低估。

Environmental, Social and Governance Report 2021/22

二零二一／二二年環境、社會及管治報告

The clinical wastes are disposed in strict accordance with the Medical Waste Management Regulations and the Administrative Measures for Medical Wastes of Medical and Health Institutions. Clinical wastes such as infectious waste, pathological waste, surgical waste, medicine waste and chemical waste must be collected and disposed by professional and qualified waste management service providers. The clinical wastes must be treated and transported separately, and temporarily stored in designated storage facilities. The designated storage facilities shall be sanitized and cleaned thoroughly afterwards. All employees are strictly required to comply with the procedures and regulations to response of contagion and infection risks. During the Reporting Period, 13.2 tonnes of clinical wastes were generated.

We will keep seeking and adopting various waste management measures in the suitable development stage, including implementation of environmentally preferable purchasing procedures, avoiding, and minimizing the use of toxic materials. For example, mercury, PVC and unnecessary disposable products.

Maintaining Indoor Air Quality

Indoor air quality is one of the significant factors affecting human health as people spend most of the time in indoor area nowadays. Therefore, continuing to improve indoor air quality to reduce indoor air pollutants and thereby reducing air pollution is essential to the employees, clients and other stakeholders. Long term exposure to microbial contaminants will increase the chance of respiratory symptoms, allergies, and asthma, as well as affect the immune system. Therefore, we established strict guidelines for maintaining indoor air ventilation, for the purpose of eliminating microbial contaminants, as well as cross-infection of diseases among patients inside the hospitals. All the ventilation systems are evaluated and examined regularly by professional and licensed employees with relevant knowledge or third-party vendors.

臨床廢物乃嚴格按照《醫療廢物管理條例》及《醫療衛生機構醫療廢物管理辦法》處理。臨床廢物(如感染性廢物、病理性廢物、外科廢物、醫藥廢物及化學廢物)須由專業、合資格廢物管理服務供應商進行收集及處理。臨床廢物須分開處理及運輸並臨時存放於指定存儲設施內。指定存儲設施在清空之後應進行徹底消毒及清潔。所有員工應嚴格遵守該等程序及規例以應對傳染及感染的風險。於報告期間內，我們的臨床廢物排放量為13.2公噸。

我們將於合適發展階段持續研究並採納多種廢物管理措施，包括實施環保型採購程序、避免及減少使用有毒物質(例如水銀及PVC)及不必要的一次性產品。

保持室內空氣質素

室內空氣質素乃與人類健康相關的重要因素之一，皆因現今人們大部分時間都在室內區域度過。因此，持續改善室內空氣質素以減少室內空氣污染物，藉此減少空氣污染對員工、客戶及其他利益相關者至關重要。長期暴露於微生物污染物將增加患呼吸道症狀、過敏及哮喘的機會並影響免疫系統。因此，為消除微生物污染物以及醫院內患者之間的疾病交叉感染，我們設有嚴格的保持室內空氣通風指引。所有通風系統均由具有專業技能、執照及相關知識的僱員或第三方供應商定期進行評估及檢查。

Environmental, Social and Governance Report 2021/22

二零二一／二二年環境、社會及管治報告

Proper Sewage Discharge

We have complied with the Disinfection Specifications. Water consumed at our hospitals would be treated by the wastewater treatment facilities built in the hospitals. Before being discharged to the municipal wastewater treatment facilities, the wastewater goes through the grilles, retention basins, septic tanks and sanitizing facilities, and is sanitized with the hydrochloric acid and sodium chlorate. To limit or avoid our employees' exposure to infectious fluid waste, we implemented a fluid waste management and strictly monitor the processes.

During the Reporting Period, we have discharged 3,633 cubic meter of wastewater. According to the Discharge Standard of Water Pollutants for Medical Organization, our emission of water pollutants was under the maximum level.

Concerted Efforts with Suppliers and Business Partners

With the aim of safeguarding the environment against the arising of the hazardous medical wastes, we have established and adopted a management mechanism with our suppliers and business partners. All medical wastes in forms of drugs and medicines were sorted and stored in designated areas. The medical wastes and domestic wastes are stored separately before being collected and handled by qualified handlers to disposal in a safe manner.

The Group will continue to closely monitor and manage the environment-related work, and to minimize the impacts to the environment from our operations. Measures will be reviewed and implemented to comply with the latest development of the relevant laws, standards, and regulations, and to strengthen our contribution to environmental protection.

妥善的污水排放

我們已遵守《消毒技術規範》。我們醫院消耗的水資源須由醫院建立的污水處理設施進行處理。廢水排入市政污水處理設施之前通過地漏、滯留池、化糞池及淨化設施，並利用鹽酸及氯酸鈉進行消毒。為限制或避免我們的員工接觸傳染性液體廢物，我們實施液體廢物管理並嚴格監控流程。

於報告期間，我們排放3,633立方米廢水並將水污染物排放控制在《醫療機構水污染排放標準》准許的最高水平內。

與供應商及業務合作夥伴齊心協力

為保護環境免受危險醫療廢物產生的損害，我們已與供應商及業務合作夥伴制定並採用一套管理機制。所有藥物及藥品形式的醫療廢物均於指定區域進行分類及存放。醫療廢物與生活垃圾在合資格處理方收集及處理前分開存放至以安全方式處置。

本集團將繼續密切監察及管理其環保工作，將其營運對環境的影響減至最低水平。我們將檢討並實施各項措施，以符合最新的相關法律、標準及法規，並加強環境保護力度。

SUPPLY CHAIN MANAGEMENT

The Group is mainly engaged in providing hospital services and relies on vendors and third-party suppliers to support the operation. We always believe our own growth is closely related with our partners by building up stable, continuous, and flexible cooperative relationships. The Group has established and implemented the procurement management policy to stabilize and strengthen the management of suppliers via responsible procurement, quality control, transparent tendering, and performance of contracts. As at 31 March 2022, we had 20 cooperating suppliers and all of them are situated in the PRC.

In general, the Group has built the Procurement Management System and applied it in all the hospitals, to outline and standardize the specifications and requirements on day-to-day procurement procedures. However, due to our hospitals being situated in different provinces, besides the consideration of quality and costs of products and services, we tend to choose the suppliers which are closer to our hospitals to reduce transportation costs, risks, as well as carbon footprint.

We are aware that healthcare procurements could lead to great impacts on environment, human rights and public health. We endeavour to achieve responsible purchasing and procuring by engaging and prioritizing vendors who follow sustainable and ethical practices; third-party certified products that meet specified medical standards and pass safety tests; advocating the supplier to take more responsibility so that products are designed to be less disposable and hazardous, and with less wastes and packagings.

供應鏈管理

本集團主要從事提供醫院服務，我們的營運依賴賣方及第三方供應商支援。我們始終相信，透過建立穩定、持續及靈活的合作關係，我們自身的成長與合作夥伴息息相關。本集團已制定及實施採購管理政策，透過負責任的採購、質量控制、透明的招標及履約等方式，穩定及加強對供應商的管理。於二零二二年三月三十一日，我們擁有20間合作供應商，全部均位於中國。

一般而言，本集團已建立採購管理制度並將其應用於所有醫院，以概括及規範日常採購程序之規格及要求。然而，由於我們的醫院位於不同省份，除考慮產品及服務質素及成本外，我們傾向選擇離我們的醫院較近之供應商，以減低運輸成本、風險及碳足跡。

我們了解，醫療保健採購會對環境、人權及公共健康產生重大影響。我們通過僱用及優先考慮遵循可持續及道德規例的供應商，從而實現負責任的採購；採購符合指定醫學標準並通過安全測試的第三方認證產品；提倡供應商承擔更多的責任，其產品應減少一次性及危害性設計，並減少廢物及包裝。

Environmental, Social and Governance Report 2021/22

二零二一／二二年環境、社會及管治報告

Invitation will be given to at least three suppliers in tender process for each procurement. In cases that only have less than three suppliers, the management of respective hospitals need to review and authorize the procurement. Supply division oversees the annual assessment and evaluation of each supplier. Once non-compliances are identified or the supplier fails to meet our required standard, such suppliers will be removed from our authorized supplier list.

Through structured vendor selection processes with comprehensive and applicable screening criteria, we attain fair operating practices and identify potential risks along the supply chain. We communicate and work closely with our suppliers and business partners as we cling to the belief that this helps to identify potential risks, understand their sustainability strategies, and optimize each other's operating efficiency.

During the Reporting Period, the Group was not aware of any significant environmental and social risks for our management decision on supply chain management.
